1. Think Outside the Box

Have you had issues with a neighbor? Has that neighbor been a business? If you have, the Office of Neighborhoods has a story and a model for resolution to share, based on one recent experience.

Historic Sutherland Heights Neighborhood board members called the Office of Neighborhoods to see what suggestions they could get about a business in their neighborhood that made constant, disruptive noise, even in the middle of the night.

OON’s suggestion was to ask for a meeting with the management, go in asking how the neighborhood and business can work together for a solution, and see if the business would be open to being good neighbors.

Several neighborhood folks planned a meeting with the staff at AAA Cooper Transportation. When the neighbors met with the management, the management did not have any ideas, but asked the neighbors to come back with some suggestions. The neighbors were unsure if there would be any improvements, but they decided to do their research.

In so doing, they discovered several different options to lower noise emissions for businesses, even some used in Europe. They called a meeting with the management again to present their findings. AAA Cooper management was delighted to hear about
the options, and within two weeks of the meeting, AAA Cooper had done their own research to pick one. Instead of the loud back up beeping, they implemented white noise machines on the backs of their trucks. This, not only caused less noise, as neighbors wanted, it was also better for the company’s staff’s hearing. The new machines also directed the noise where it needed to go, which was safer.

While looking into what was making all the noise an observer noticed that some of their equipment drivers were making noise when they were delivering loads. They noticed that if the drivers would make one small change, they would not make as much noise. While making these changes, they also discovered that it was easier on the vehicles, causing the need for fewer repairs. In the end, it was a win/win for the company and the neighborhood.

Several weeks after the changes happened, the management called the neighborhood folks and asked if they noticed a difference. Saying, “Yes, we have.” And the AAA Cooper staff invited the neighborhood over to see all the changes in person.

The AAA Cooper staff was very excited with the upgrades and so were the neighbors.

10. **Leaders for Readers Needs Volunteers**

Do you have a spare hour per week to share with a child learning to read? Leaders for Readers, a program of [Great Schools Partnership](#), is calling on you.

**Leaders for Readers**, a literacy program of the Great Schools Partnership and Knox County Schools, has recently expanded. The program is adding another 10 schools for a total of 25 elementary schools being served and need volunteers.
The program, now in its fifth year, helps first, second, and third graders improve their reading skills. From the first through the third grade, children learn to read. In the fourth grade they begin reading to learn. If students aren’t reading proficiently, they struggle with the learning process throughout school and could fall behind academically and socially. This is what led to the start the Leaders for Readers program.

As a volunteer, you are matched with up to 3 students who are just on the cusp of reading at grade level. For an hour each week, each student reads to their volunteer from books their teacher selects while the volunteer helps with everything from pronunciation to understanding the story. A volunteer’s most important job is to be the child’s “cheerleader” and build their confidence as they read to you. This hour volunteered each week can create a lifetime of change for students who need some additional encouragement.

There are students ready to read with you right now at the following elementary schools: Inskip, Spring Hill, Sarah Moore Greene, and Green Magnet!

Register to volunteer using this form. Or to get more information, contact Janine Al-Aseer at 865-215-2820.
